

# How to change your name on Radioid

Submitted by Keith, KK5ZD

The following are the directions to get your name changed/updated on the radioid.net web page which also shows up on the digital contact list. A typical change might be changing your from Radioid having your first name/middle initial to just your middle name.

The process looks straightforward but having it documented really helps:

Go to [www.radioid.net](http://www.radioid.net)

login/signup: login

Go to the support page, create and submit a ticket to have the admin request performed.
